

*THE* **FUTURE**  **IS NOW**

2019 LEARNING YEAR CALENDAR

YPO

Gold Washington DC - Baltimore Chapter

Dear Friends,

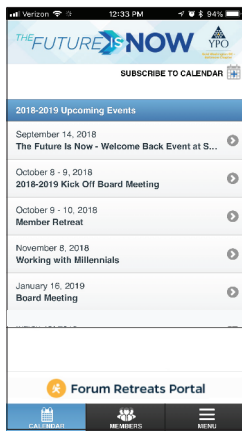

In the less than 2 decades since we entered a new millennium, our world has profoundly changed. Smart phones connect us as never before. The mapping of the human genome has ushered in a new era of personalized medicine. News has become “fake”. Reality has become “virtual”. A new generation has entered the workforce with a lifetime of digital experiences. And technology has changed security, social networking, spy craft, and even how we connect, communicate, and love each other.

The world we dreamed might exist at some point in the future is here. The Future is NOW.

Our education year is devoted to bringing us all up to this present future - to helping us realize the benefits, the risks, and ultimately, the opportunities that exist for us all.

Sid Banerjee  
2018-2019 Learning Officer
